5. Part number.....	12
---------------------	----

1. Overview

Aim of this document is the description of features, functions and interfaces of the EZ863H unit.

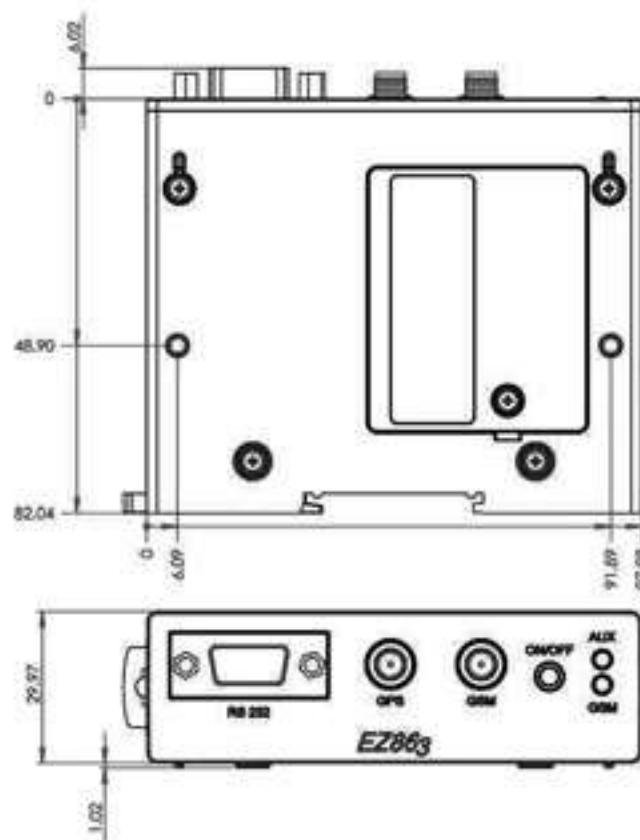

The EZ863H is a complete system solution for many M2M metering applications like Gate control, cellular alert systems, Automatic meter reading (AMR) and more.

The unit includes Telit GE910 cellular GSM\GPRS engine with Python and microcontroller for peripheral assistance.

2. General Description

2.1 Dimensions

Dimensions: 98 mm x 82mm x 30mm

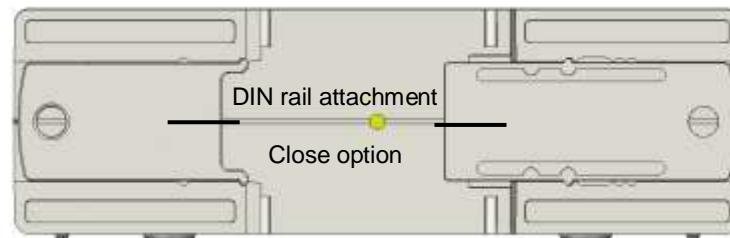

2.2 Weight

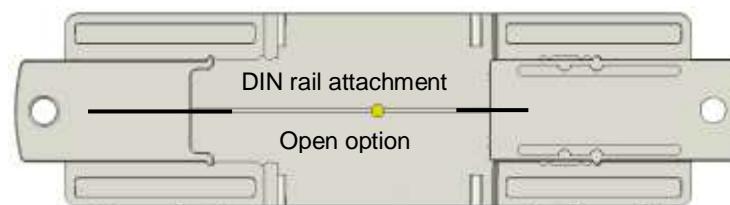

The weight of the EZ863H is 160 grams.

2.2 Installation

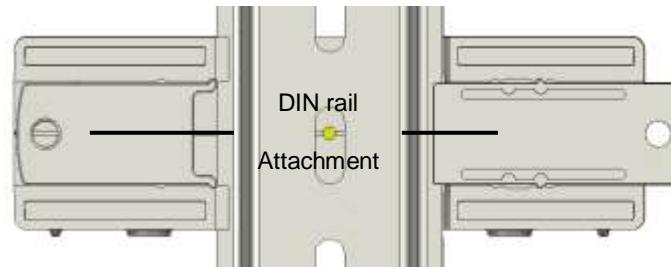

The EZ863H can be installed in few ways:

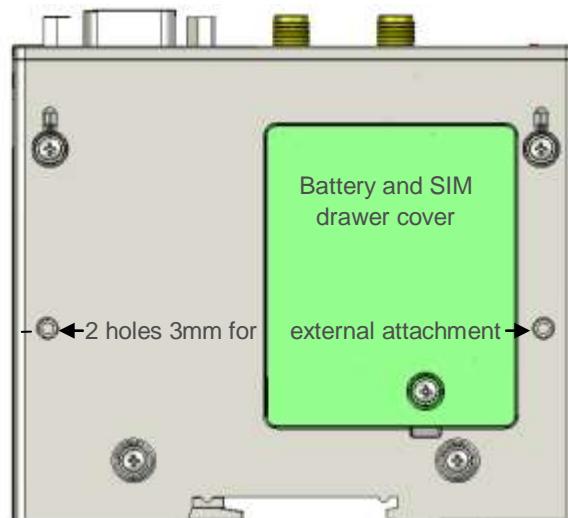

EZ863H Terminal rear view 1- DIN rail attachment close

EZ863H Terminal rear view 2 – DIN rail attachment open

EZ863H Terminal rear view 3 – DIN rail attachment lock on DIN rail

9

EZ863H Terminal bottom view

5

2.3 Casing material

PC/ABS Cyclooy 1200 HF

2.4 Class of flammability

UL94 HB

2.5 Protection class

IP40 Avoid exposing the EZ863H Terminal to liquid or moisture

2.6 Environmental requirements

2.6.1 Temperature range

	Ambient temperature in plastic enclosure	Note
Operating Temperature Range	–20°C to +55°C	The unit is fully functional in all the temperature range, and it fully meets the ETSI specification
	–30°C to +85°C	The module is fully functional in all the temperature range. Temperatures outside the range –20°C to +55°C, might slightly deviate from ETSI specifications
Storage and Non-Operating Temperature Range	–40°C to +85°C	

2.6.2 Air humidity range

5% - 85%

2.6.3 RoHS compliance

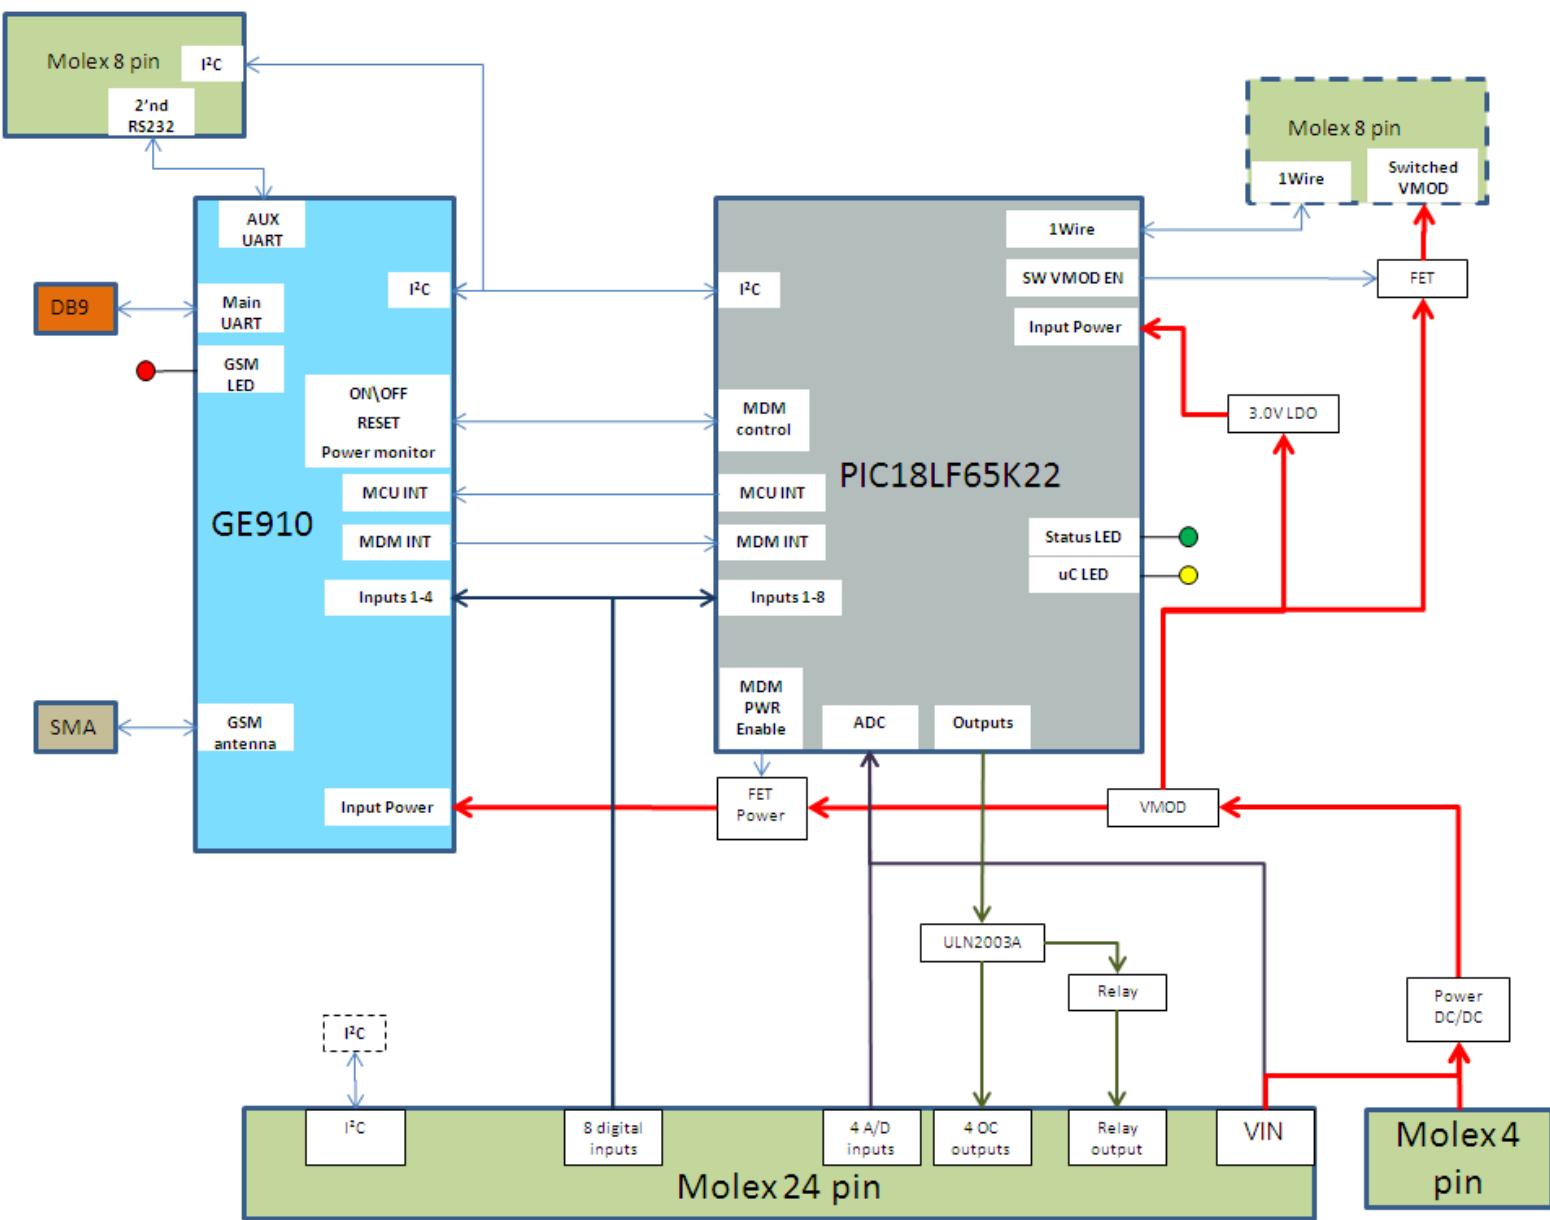

All hardware components are fully compliant with the EU RoHS and WEEE Directives

3. Hardware Interface Description

3.1 Main features of the EZ863H

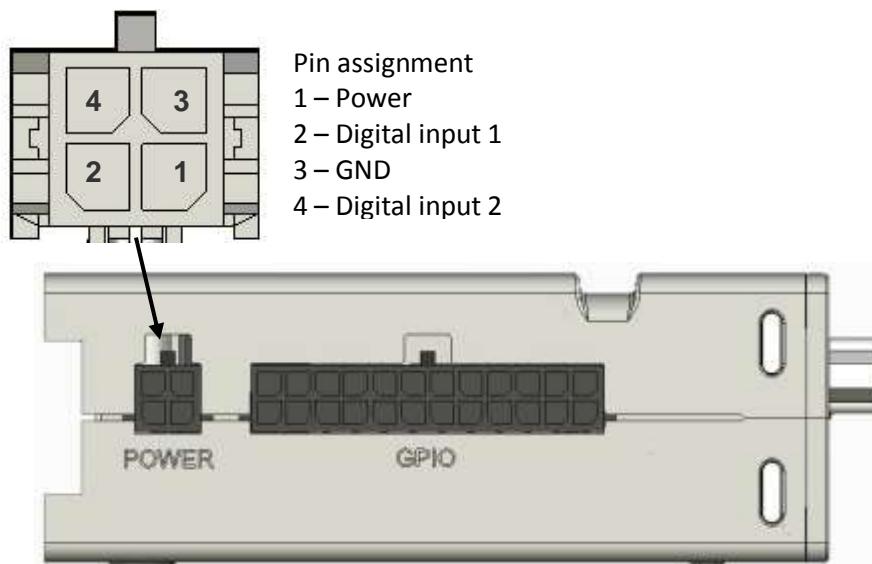

Feature	Implementation
Incorporates Telit GE910 module	The Telit module handles all GSM\GPRS processing with PYTHON script interpreter
PIC18LF65K22 Microcontroller	Low power microcontroller that use for modem watchdog and peripheral support
Frequency bands	Quad-band EGSM 850 / 900 / 1800 / 1900 MHz
Power supply	Single supply voltage 8V to 55V 15W
ADC and GPIO inputs	<ul style="list-style-type: none"> • 1 Relay output 30V 1A • 2 12bit ADC inputs 0-50V • 2 12bit ADC 4-20mA • 8 digital inputs 0-50V • 4 open collector outputs 500mA
Energy modes	<ul style="list-style-type: none"> • Full operated – GSM– 35mA • GSM off (uC on) - <3mA
Communication	<ul style="list-style-type: none"> • Full RS232 • RS232 Tx, Rx - modem trace • I²C • 1 wire • USB
Antennas	GSM external antenna with SMA connector

3.2 EZ863H Hardware block diagram

4. Interface Description

4.1 Molex 4 pin connector – Power connector

4.1.1 Power Supply

The power supply of the EZ863H Terminal has to be a single voltage source of power 8V-55V capable of providing a peak during an active transmission. The EZ863H Terminal is protected from supply reversal voltage. An internal fuse ensures an electrical safety according to EN60950. This fuse is not removable. A fast acting fuse 0.8A with melting is necessary to use with the EZ863H Terminal at a 24V power supply system for vehicles. The power supply must be compliant with the EN60950 guidelines.

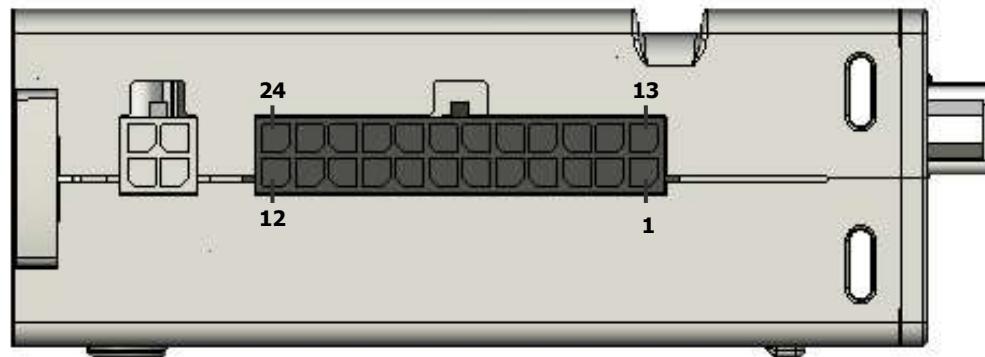

4.1.2 Supply voltage requirements

A DC power supply must be connected to the POWER input:

- Input voltage range 8 - 55V DC
- Nominal Voltage 12V DC
- Power Supply current rating: min. 1,2A @12V
- Power Supply ripple: max. 120mV
- Input current in idle mode: 40mA @ 12V
- Input average current in communication mode: 100mA @ 12V

4.2 Molex 24 pin connector – IO interface

The following interfaces and functions are provided via the IO interface connector.

GPIO interface connector 24 pin

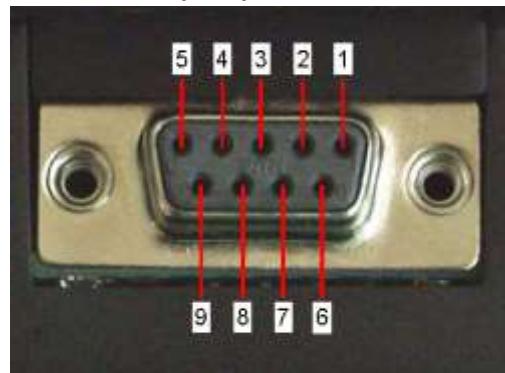

Pin	Signal name	I/O	Description
1	Digital input 1	I	0-50V digital input
2	Digital input 2	I	0-50V digital input
3	Digital input 3	I	0-50V digital input
4	Digital input 4	I	0-50V digital input
5	OC1	O	Open collector 500mA output
6	OC2	O	Open collector 500mA output
7	OC3	O	Open collector 500mA output
8	OC4	O	Open collector 500mA output
9	ADC1	I	0-50V 12bit analog input
10	ADC2	I	0-50V 12bit analog input
11	VMOD	O	VMOD voltage output for external accessory activation
12	DGND	PWR	Digital ground
13	Relay A	O	Relay output A
14	Relay B	O	Relay output B
15	Digital input 5	I	0-50V digital input
16	Digital input 6	I	0-50V digital input
17	Digital input 7	I	0-50V digital input
18	Digital input 8	I	0-50V digital input
19	ADC3	I	4-20mA 12bit analog input
20	ADC4	I	4-20mA 12bit analog input
21	I2C SCL		I2C bus clock
22	I2C SDA		I2C bus data
23	PLG GND	PWR	Plug ground
24	Vin	PWR	Input voltage

4.3 RS-232 Interface

The serial interface of the EZ863H Terminal is intended for the communication between the GSM module and the host application. This RS-232 interface is a data and control interface for transmitting data, AT commands and providing multiplexed channels. EMC immunity complies with the vehicular environment requirements according to EN301489-7.

The user interface of the EZ863H Terminal is accessible from a Data Terminal Equipment DTE connected to the RS232 interface and it is managed by AT commands according to the GSM 07.07 and 07.05 specification and the supported commands are listed in the AT Commands Reference Guide.

4.3.1 D-Sub 9-pole pin out

Pin assignment RS-232
(D-Sub 9-pole female)

Pin no.	Signal name	I/O	Function of application
1	DCD	O	Data Carrier Detected
2	RXD	O	Receive Data
3	TXD	I	Transmit Data
4	DTR	I	Data Terminal Ready
5	GND	-	Ground
6	DSR	O	Data Set Ready
7	RTS	I	Request To Send
8	CTS	O	Clear To Send
9	RING	O	Ring Indication

Connector type on the terminal is:

- RS-232 through D9-pin female
- Baud rate from 300 to 115.200 bit/s
- Short circuit (to Ground) protection on all outputs.
- Input voltage range: -12V to +12V

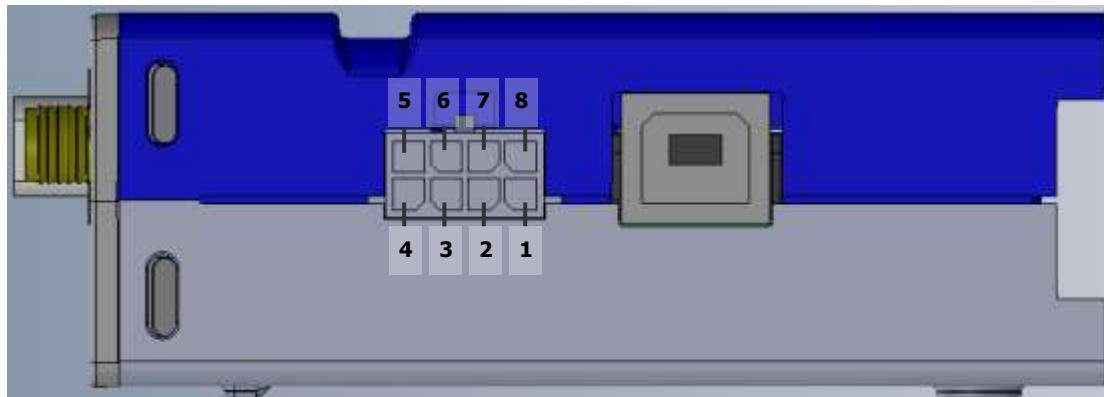

4.3.2 The PC as Data Terminal Equipment (DTE)

The software application for using the PC RS232 standard serial interface (COM-port) as Data Terminal Equipment (DTE) like Hyper Terminal, Putty, etc...

Connect using the COM-port to which the EZ863H Terminal is connected with the following settings:

4.4 Molex 8 pin connector – AUX interface

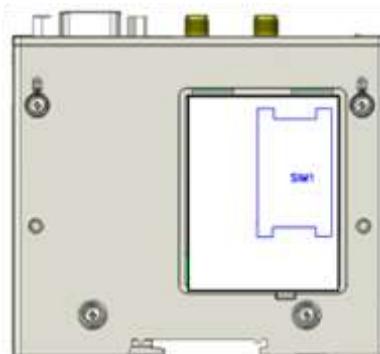

Pin	Signal name	Description	Cable Color
1	AUX RX	Modem AUX port RX – RS232 level	Black
2	AUX TX	Modem AUX port TX – RS232 level	Red
3	I2C SCL	I2C bus clock	Brown
4	I2C SDA	I2C bus data	Orange
5	SW VMOD	Switched VMOD	White
6	uC RX	uC RX port – RS232 level	Blue
7	1Wire	1Wire bus	Green
8	GND	Ground	Yellow

4.5 USB B connector - USB 2.0

The GE910 modem includes one integrated universal serial bus (USB) transceiver

4.6 SIM Interface

The SIM interface is intended for 3V SIM cards. The card holder is a five wire interface according to GSM 11.11. A sixth pin has been added to detect whether or not the SIM card drawer is inserted. Removing and inserting the SIM card during operation may require the software to be reinitialized. Therefore, after reinserting the SIM card the modem will detect it automatically, but it may be necessary to restart EZ863H Terminal.

5. Part number

The EZ863H-2G part number is EZ863H-QAD.
